

AJAY BRUSH INDUSTRIES

Brushes
Customized &
Engineered
to Precision

ESTABLISHED - 1962 | AHMEDABAD | INDIA

Company Profile :

"Ajay Brush Industries", is a renowned manufacturer and supplier of an assortment of brushes that caters to the complete spectrum of brush requirements of an array of industries including Textile, Filling and packaging, Construction, Metals, Heavy Engineering, Aviation, Food & Pharma.

With a humble beginning in the city of Ahmedabad way back in 1962, By **Mr. Kaniyalal Ambalal Shah**, legacy is carried forward by **Mr. Ilesh K. Shah** and **Mrs. Mala I. Shah** now is being managed by **Mr. Rushabh I. Shah**. In this course of time we realized the need to cater to the extensive requirements and demand for brushes to clean, deburr, finish and polish. Our usage of optimum quality raw material, along with advanced technologies are in compliance with today's industry standards and what causes demand for our brushes to be so high.

Some of our in demand brush products include Spiral Wire Brushes, Nylon Spiral Brushes, Wire Brushes and Nylon Strip Brushes. Apart from these, we also offer a wide assortment of Cleaning Brushes like Tube Cleaning Brushes, Roll Brushes, Spiral Brushes, washout brushes and many such more. Our brushes are easy to handle, durable and smooth in texture with thin bristles. Each and every brush is analysed, tested with firm checks and balances in place on parameters like raw material used, construction, sturdiness, durability and reliability to ensure their efficiency and credibility.

Additionally, our strong engineering team, headed by Mr. Rushabh Ileshkumar Shah, Who has done His masters in Mechanical Engineering in Germany. Also has an extensive work experience in Mercedes Benz Werke as production associate, Bosch group as production planning Engineer, and Clean-Laser systems as research and development Engineer and can offer you a complete customized solution that caters to your unique brush need and ensures you are able to utilize the product to the optimum.

We have a state-of-the-art infrastructure facility with a brand new contraption and well trained and experienced staff, making that delivers minimum errors, maximum productivity ensuring continuity in ops and assurance of delivery.

The organization is divided into 4 verticals of manufacturing, quality inspecting, warehousing and packaging and sales and marketing. With our goal of distribution of products worldwide, we have set the benchmark for quality and innovation across the field of Textile, Printing , Filling and packaging, automobile, food, pharma, household, cleaning and industrial sectors. In a market which has fierce competition in this field, "**Ajay Brush Industries**" with combination of Legacy of experience in manufacturing and **German technical expertise** proudly stands ahead of their industry counterparts.

STRIP / CHANNEL BRUSH

Nylon strip brushes feature a formable metal structural element known as the channel base, and nylon/metal brush fill that can be varied by trim length, density, and flexibility. A brush strip filled with nylon filament is often used as a flexible brush seal on equipment. A strip brush functions as a flexible shield and curtain against mist, dust, light, heat, or intrusion into a point of operation.

Nylon or strip brushes have many benefits for the industries like controlling dust, sealing of conveyor system gap, airflow control etc.

NYLON-ROLLER BRUSHES

This Nylon Roller brushes are manufactured by utilizing high quality raw materials and latest technology. Outer diameter of cylindrical brush, RPM (Runs per Minute), pressure, temperature and functional requirement are the main objectives to decide size and type of raw material.

This cleaning brushes feature like versatile performance in mild cleaning, heavy cleaning, and scrubbing, spreading, grading, polishing, degreasing, deburring, sanding, brush strip filled with nylon filament etc.

DISC / CIRCULAR BRUSH

Our disc brushes are multi-directional deburring tools that function equally on all component edges. They adapt readily to CNC machine centers, robot cells, and fixed finishing machines. Use with coolant and on any metal and wooden surfaces. They are available in a variety of styles to remove any amount of burr. Ideal for surface preparation, cleaning and finishing applications, our custom made disc brushes are available in a selection of materials and styles to suit all applications.

BOTTLE / TUBE CLEANING BRUSH

This tube brush is made of nylon. It also known as Boiler Brush. Great for cleaning test tubes in a classroom or laboratory setting. This is used for threads, pipes, holes, keyways, etc. Heavy-duty construction offers long service life and most effective brushing action. Achieves optimal performance when fully chucked in drill presses and collet-equipped portable tools.

Use these brushes to clean dirt and remove sharp edges from pipes, tubing lines, and small drains and openings. Tubing brushes are designed to clean pipe/tubing lines and gaps with stiff bristles. These durable brushes are great for use in hard-to-reach areas, such as inside elbows, tees, and valves.

TEXTILE INDUSTRIES

We offer a wide range of Brushes for Textile Machines. We specialise in customisation as per the requirement of Customer according to their design or intended application (consultation provided from our end) Brushes can be reverse engineered according to sample or even from a worn-out part.

STENTER & ACCUMALATER BRUSH

Application : Stenter Machine for Holding cloth in Pin Bar. customer Requirements

Brush Material : Nylon, Nylon 66 , Pig Bristle, Animal Hair Polyamide, etc

Base material: Aluminum, High Grade polypropylene, Cast Nylon, Nylon etc

Advantage : Stenter Brushes are available in Various Sizes and Dimension as per Customer Requirement

PHARMA INDUSTRIES

We manufacture food grade brushes specially for pharma companies for tableting and strip packaging machines. we also provide customized Brushes

TEXTILE ROLLER BRUSHES

All standard diameters from 50 - 500 mm Rollers available in all standard working widths in split and non-split design possible. The Molded Brush Sleeves is made of High graded Polypropylene Material and can be Interchangeable. The Brush Roller is manufactured with High tech European Technic to Achieve Higher Quality Results.
